* The data counts cases, where possible, for individual attorneys. Identified firms are counted if an individual attorney's name was unavailable. Thus, the numbers for an individual attorney or for a law firm may be understated since the data counts each case only once. For example, a case counted for "John Smith" is not counted again for the law firm of "Smith & Jones".

* Attorney or firm information for less than 1% of filings is not yet available and is tallied in the **(missing)** row.
